

HHP\$™

Herd Health Profit Dollars™

As dairy owners invest in fewer replacement heifers, additional focus must be on creating cows that stay healthy, with reduced challenges of mastitis and lower Somatic Cell Scores. The HHP\$™ index is designed to produce cows that are highly productive and built to last.

HHP\$ is a health-focused index to rank heifers in herds that genomic test but do not test with Zoetis or have CLARIFIDE® Plus results. HHP\$ is a tool that can be used for A.I. sire selection that provides a health-focused index to use across the industry to rank bulls on the future profitability of their daughters.
